

Wedding CD Holder - by Lyn Dwyer

Tools

- Fiskars® Premium Trimmer
- Fiskars® Fingertip Control Knife
- Fiskars® Border Punch-Sunburst
- Fiskars® Craft Mat

Materials

- Bella Wedding Cardstock Stickers BW C92 and BWCO8
- Bella Wedding Range –Wedded paper
- Square Embossed White Cards with Envelopes –Imprints “Fleur de Lys
- Adhesive DS tape
- Sandpaper-fine

Step One

Open card out. Make sure that the pattern is the right way up. Place card on craft mat and cut through the card on the diagonal.....see the photo above. You can cut this with a Fiskars Trimmer or the Fiskars Fingertip Craft Knife. Start cutting about 1” in from the corner and leave the same distance the other end. Just wide enough to fit the CD in.

Step Two

Using your trimmer cut a piece of the Wedded Paper 1” x 5.5” . Punch along one edge of paper with Fiskars Sunburst Border Punch. Distress the edge with some fine sandpaper or even an emery board will do so that the white core of the paper shows.

Step Three

Adhere the strip of paper to the inside of the CD Holder so that only a little of the punched edge shows...see photo. Arrange your bird stickers as shown in the picture.

Step Four

Take stickers and attach to the front of the CD Holder as shown above.

Step Five

Adhere card together using DS Tape on the inside of card. If you wish to keep this as a Card...then just add some white Cardstock under the CD inside so that you don't see the CD on opening the card.

Tips to Remember:

- *Make sure you have a solid surface to punch on. You could try another Border Punch.*
- *If using the craft knife you may need to use a metal ruler.*
- *Using different stickers will create a different look.*
