Step One

Punch a hole in the front of your Card using the Fiskars Circle Everywhere Punch. Make sure you leave about 2cm from the top and then line up the punch in the middle of card front. Keep the punched out circle for later.

Step Two

Cut a strip of paper 2" x the width of your card with Fiskars Trimmer. Punch along one edge of paper with Fiskars Sunburst Border Punch.

Step Three

Cut a length of ribbon the width of your card. Thread ribbon through the ribbon bucklez clasp.

Step Four

Adhere stickers and ribbon as shown in photo. Adhere flower to the circle that you punched out earlier using DS tape. Line this flower up so that it shows through the hole in the front of the card and then adhere to inside of card.

Tips to Remember:

- Make sure you have a solid surface to punch on. You could try the Square Everywhere Punch for variety.
- Perhaps use a different Border Punch or another colour flower.
- Try adding some acetate underneath the punched circle to create a window effect.
